

DECK-O-SEAL

OUR LINE WILL HELP YOU BUILD NEW DECKS
AND REFURBISH EXISTING PROJECTS

For years, DECK-O-SEAL has been a well known and trusted name for pool deck construction, reconstruction, and protection. Our joint sealant products have become a mainstay in the pool industry. We also provide curing and sealing compounds, expansion joints, and various other products to create a pool deck that will last. Our products are also a great fit for restoration and refurbish projects to make that old deck look good as new.

Whether you plan to protect your brand-new deck from salt staining, or you are planning a rejuvenation project on your old surface, do it right with DECK-O-SEAL.

CONSTRUCTION LIQUIDS

USE DECK-O-GRIP® AND DECK-O-SHIELD™ TO MAKE YOUR POOL DECK A NON-STAINING, PRISTINE, SLIP-RESISTANT, ARCHITECTURAL-GRADE SURFACE.

DECK-O-SHIELD

is a ready-to-use, water-based sealer/water repellent for natural stone, concrete, and masonry surfaces. DECK-O-SHIELD is designed for use as a sealer/water repellent on waterfalls in or around swimming pools; the product will limit the penetration of water into structurally sound, crack-free surfaces. The product also can be used as a sealer/water repellent for natural stone decks, copings, walkways, or patios; virtually any area located near or around swimming pool areas. A DECK-O-SHIELD treated surface will inhibit the penetration of salts into the surface, reducing "whitening" or staining. DECK-O-SHIELD provides a matte finish to the surface.

DECK-O-SHIELD PLUS

is a premium-grade, ready-to-use, waterbased sealer formulated for use on natural stone. DECK-O-SHIELD PLUS is formulated specifically to seal porous surfaces and is ideal to use on pool copings and decks protecting them from salt penetration. It can be used on all porous surfaces such as natural stone, tile, concrete, pavers, and grout. DECK-O-SHIELD PLUS provides a solution to spalling and pitting of porous stone and concrete surfaces caused by salt penetration as well as spalling caused by freeze-thaw cycles. DECK-O-SHIELD PLUS provides a matte finish to the surface.

DECK-O-TREAT

Concrete Curing Aid is a ready to use curing aid formulated to aid in curing gunite and shotcrete. It contains no wax, resin, or acids and is VOC compliant. Eliminates the need to water gunite or shotcrete several times a day for seven days. Surfaces treated with DECK-O-TREAT can later be covered by additional finishes such as paint, tile, adhesive or plaster.

DECK-O-GRIP

is a non-yellowing, acrylic-based, high solids, transparent, easy-to-apply liquid cure and seal. It provides a clear, flexible and durable abrasion- and stain-resistant protective film. DECK-O-GRIP also offers improved resistance to most of today's common pool chemicals. It is specifically designed to retain and enhance the appearance of colored concrete and exposed aggregate surfaces for years to come. The compound contains a slip-resistant additive, which establishes an easy-to-clean, non-slip surface for traditionally slippery areas. DECK-O-GRIP provides a gloss finish to the surface.

DECK-O-GRIP W/B

is a water-based formulation that meets the very strict maximum VOC content limits of 200 g/L for sealers as required by certain California Air Pollution Control Districts, as well as the 400 g/L VOC maximum required by the U.S. EPA Architectural Coatings rule for Sealers. DECK-O-GRIP W/B provides a gloss finish to the surface. DECK-O-GRIP W/B has the same benefits and properties of our standard DECK-O-GRIP product, such as stain- and slip resistance.

VOCOMP®-25

VOCOMP-25 is a ready-to-use concrete curing and sealing compound formulated of special acrylic polymers in a true water-based carrier. VOCOMP-25 resists yellowing from ultraviolet exposure and provides a durable, long-lasting finish that offers improved resistance to chemicals, petroleum, and abrasives. VOCOMP-25 appears milky white in the container and, when first applied, leaves a bluish cast on the concrete for easy visual coverage. VOCOMP-25 dries clear to provide a transparent sheen finish. This sheen can be controlled by the number of coats applied.

CS-309™-25

CS-309-25 acrylic curing and sealing compound is a clear, transparent, ready-to-apply, non-yellowing liquid compound formulated from special acrylic polymers and quick-evaporating solvents that effectively cures and seals freshly placed concrete. Once properly applied, CS-309-25 provides a premium-grade film for optimum moisture retention. This produces a hard, dense, high-compressive strength concrete. CS-309-25 will minimize hair-checking as well as premature cracking, dusting, spalling, and other common defects that result when concrete is not properly cured. This easy-to-use compound dries quickly and protects the concrete during construction. It resists adhesion of mortar droppings and permits easier cleanup.

DECRA-SEAL™-NATURAL

DECRA-SEAL NATURAL is low-VOC, water-based sealer that enhances the natural color and features of decorative concrete, pavers, unglazed tiles, and a variety of porous natural and artificial stone. DECRA-SEAL NATURAL is a penetrating water repellent that chemically bonds to the substrate, helping to increase the service life.

JOINT SEALANTS AND EXPAN

OUR JOINT SEALANTS AND EXPANSION JOINTS WILL PROTECT YOUR POOL DECK FROM CONCRETE INTRUSION, WHILE ALSO MAINTAINING THE AESTHETIC LOOK OF YOUR DECK

Seal all cracks and joints with DECK-O-SEAL two-part, elastomeric, polysulfide-based joint sealant. DECK-O-SEAL is used for sealing joints subject to concrete movement to provide a firm, flexible, weather-tight seal.

It is ideal for sealing joints in and around swimming pools, and is applicable for both interior and exterior use. DECK-O-SEAL is highly resilient and has excellent recovery characteristics after extended periods of compression or elongation.

DECK-O-SEAL is available in a variety of formulations to meet every need in pool deck construction and refurbishing:

DECK-O-SEAL

DECK-O-SEAL two-part, polysulfide-based joint sealant is a premium-grade, pourable, self-leveling sealant.

DECK-O-SEAL 125

DECK-O-SEAL 125 two-part, pourable joint sealant is a self-leveling, polysulfide-based sealing compound. It is a non-staining sealant that cures to a firm, flexible, tear-resistant rubber. DECK-O-SEAL 125 is a self-leveling product that is engineered for submerged applications and heavy traffic areas.

DECK-O-SEAL GUN GRADE

is a two-component, non-sag, non-flowing, polysulfide-based sealing compound. It is designed for vertical applications as well as submerged applications.

PRODUCT COVERAGE

THIS CHART SHOWS THE APPROXIMATE NUMBER OF LINEAL FEET WHICH CAN BE SEALED WITH A 96 OUNCE DECK-O-SEAL KIT.

MOVEMENT AND WATER

HS-1 SL

HS-1 SL is a one-part self-leveling hybrid polymer sealant developed using SMP technology designed for horizontal expansion joints in swimming pool decks, patios, and sidewalks. It is packaged in a convenient, easy to use 32 ounce pouch. Just screw on the supplied application tip and apply HS-1 SL into the joint by squeezing the foil pouch. HS-1 SL is self-leveling and does not need to be tooled. It cures under the influence of atmospheric moisture to form a medium modulus sealant with excellent adhesive properties and resistance to ageing and weathering.

- One part – no mixing
- Self-leveling – no tooling
- Pouch can be resealed
- Apply to green concrete or damp surfaces
- Bubble-free curing when applied properly
- Non-gassing
- Tack-free in 50 minutes
- Easy to use 32 oz. foil pouch – no tools or caulking gun needed
- Available in tan and gray
- Twelve month shelf life
- VOC compliant
- Stocked nationwide at all W. R. MEADOWS® locations
- Can be purchased in combination with all other DECK-O-SEAL or W. R. MEADOWS products

JOINT SEALANTS AND EXPAN

OUR JOINT SEALANTS AND EXPANSION JOINTS WILL PROTECT YOUR POOL DECK FROM CONCRETE INTRUSION, WHILE ALSO MAINTAINING THE AESTHETIC LOOK OF YOUR DECK

DECK-O-SEAL ONE STEP®

is a single-component, non-sag, elastomeric, polysulfide-based sealing compound used for caulking joints in structures that are subject to movement caused by temperature changes.

What is the shelf life of DECK-O-SEAL and is that information furnished on the package?

The shelf life from date of manufacture for DECK-O-SEAL two-part is one year when stored in unopened containers under 80°F. The shelf life for DECK-O-SEAL ONE STEP is six months, when stored in unopened containers under 80°F. The information is contained in the Batch Number supplied on the package. The Batch Number is explained as follows:

Batch Number: 2PA001:

2 = Year Manufactured - 2022

P = Pomona, CA - location of DECK-O-SEAL manufacturing facility

A = month produced - A=Jan, B=Feb, C=Mar, D=April, E=May, F=June, H=July,

J = Aug, K=Sept, L=Oct, M=Nov, N=Dec.

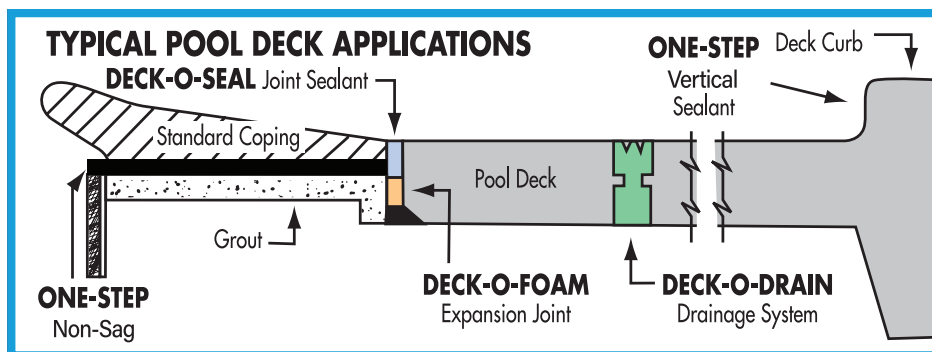

001 = Control Number of the specific batch

MOVEMENT AND WATER

KOOL-ROD™

is a closed cell, polyethylene, flexible, rope-like foam joint backing material. This material is virtually non-absorbent and chemically inert to most solvents. KOOL-ROD will not stain or adhere to sealant materials. It is fully compatible with acrylic, butyl, polyurethane, polysulfide, silicone, and most other cold-applied sealant compounds. KOOL-ROD is now available in an easy-to-handle bag that allows for smaller packaging for added contractor convenience.

KOOL-ROD SOFT

is a polyethylene, flexible, rope-like foam joint backing material. This material is virtually non-absorbent and chemically inert to most solvents. KOOL-ROD SOFT will not stain or adhere to sealant materials. It is fully compatible with acrylic, butyl, polyurethane, polysulfide, silicone, and most other cold-applied sealant compounds. KOOL-ROD SOFT is specifically designed as a compressible backing material to be used in conjunction with a wide variety of cold-applied joint sealants. This special SOFT formulation features enhanced compression attributes, and is also non-gassing and non-bubbling. KOOL-ROD SOFT's compressibility allows the product to fit into a greater variety of joint sizes. Now available in an easy-to-handle bag that allows for smaller packaging for added contractor convenience.

DECK-O-FOAM™

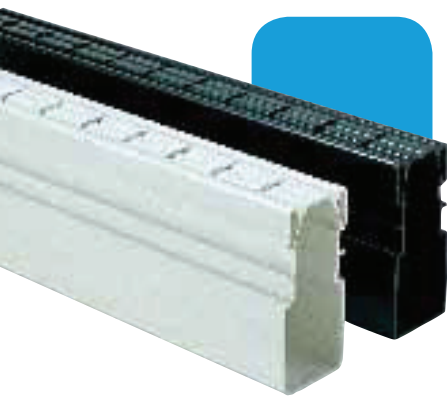

DECK-O-FOAM expansion joint filler is a flexible, lightweight, non-staining, polyethylene, closed-cell expansion joint filler. It is a chemical-resistant, ultraviolet stable, non-absorbent, low density, economical, compressible foam that offers an extended service life in both interior and exterior applications.

JOINT SEALANTS AND EXPAN

OUR JOINT SEALANTS AND EXPANSION JOINTS WILL PROTECT YOUR POOL DECK FROM CONCRETE INTRUSION, WHILE ALSO MAINTAINING THE AESTHETIC LOOK OF YOUR DECK

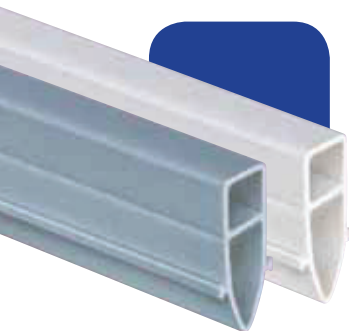

DECK-O-DRAIN®

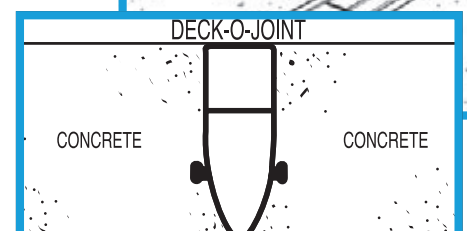

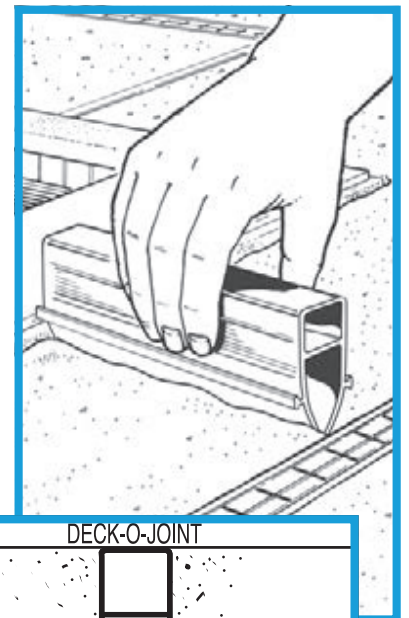

DECK-O-DRAIN drainage system provides an effective drainage system for concrete pool decks. Wherever specified, the system effectively collects and carries water away quickly from pool decks and other patio areas. Made of tough, long lasting PVC, the DECK-O-DRAIN system resists wear and is non-corrosive. Both the deck and subgrade receive watertight protection.

DECK-O-JOINT®

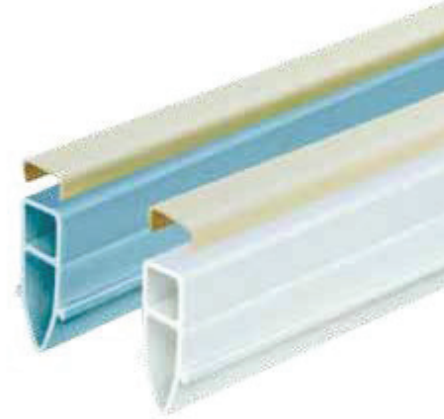

is an attractive and decorative vinyl control joint. Economical DECK-O-JOINT is long lasting and trouble-free. It resists most chemicals. A light hose-down keeps it bright and clean. DECK-O-JOINT will not whip or warp. It protects against cracking and buckling. Generally, damage caused by excessive water flow through joints is reduced. The advanced design and exclusive self-leveling of DECK-O-JOINT provides a protective ledge, which locks to concrete and seals against seepage and excessive water flow. DECK-O-JOINT provides a plane of weakness to help control cracking.

SION JOINTS

MOVEMENT AND WATER

RENU-STRIP®

is a flexible and rugged vinyl capping strip designed to make faded or broken DECK-O-JOINT look brand new. It fits all DECK-O-JOINT Expansion Joints or any other 5/8" wide plastic joint. The fast and easy installation of RENU-STRIP offers an economical way to revitalize an existing pool deck's appearance. receive watertight protection.

W. R. MEADOWS PRODUCTS FOR USE IN POOL DECK APPLICATIONS

MEADOW-PLUG™

is a specially blended, extremely fast setting, hydraulic cement product designed to instantly stop running water or fluid seepage in concrete or masonry structures. This single component, high strength repair mortar permanently plugs non-moving cracks, joints, and voids.

SPEED-E-ROC

is a pourable, rapid setting and hardening, high strength, hydraulic cement compound designed for anchoring and grouting. SPEED-E-ROC has a controlled expansion system and is non-shrink. SPEED-E-ROC has an initial set time of 10-20 minutes at 77° F (25° C) and obtains 5,000 psi (34.4 MPa) in one hour.

ACRY-LOK™

is a high solids, acrylic polymer latex bonding agent and admixture. This milky white liquid is non-yellowing in Portland cement mortars and concrete. When used as an admixture, ACRY-LOK provides increased abrasion and crack resistance, flexural strength, and freeze/thaw tolerance. Permeability is also reduced, providing added protection from chloride intrusion.

REZI-WELD™ LV

REZI-WELD LV low viscosity injection epoxy is a moisture insensitive, very low viscosity, high modulus, high strength, structural injection resin. REZI-WELD LV is recommended as a primer for DECK-O-SEAL and HS-1 SL for optimum adhesion and joints over 1" (25.4 mm) in width.

REZI-WELD 1000

REZI-WELD 1000 is a medium viscosity, two-component, construction-grade structural epoxy adhesive. It is moisture insensitive and resistant to many chemicals. High modulus, high strength REZI-WELD 1000 is color coded to assure proper mixing, and is self-leveling and easy to apply.

REZI-WELD GEL PASTE

is a high viscosity, rapid setting, thixotropic, structural, epoxy-based, chemical anchoring/bonding adhesive and injection resin. REZI-WELD GEL PASTE provides high mechanical properties and bond strength to concrete and various other substrates. REZI-WELD GEL PASTE is a two-component, moisture insensitive construction epoxy, which can be troweled, brushed, injected, or pumped.

X-FOAM™

FLEXIBLE TILE LEDGER BOARD

X-FOAM is a flexible lightweight polypropylene swimming pool tile ledger board. The board is very flexible which means there will be little to no breakage. The ends of a 10' piece of X-FOAM can be placed together forming a circle of just over 3'. It will easily bend around small radiuses. X-FOAM is also re-usable. Available in multiple sizes. Adhere X-FOAM to the pool side with nails.

X-FOAM PACKAGING

Thickness	Widths	Standard Length
1/2" (12.7 mm)	3.5", 6" (88.9 mm, 152.4 mm)	10' (3.05 m)

NOW YOUR CUSTOMERS HAVE THREE DIFFERENT WAYS TO PROTECT THEIR POOL DECKS.

Choose deck treatments from DECK-O-SEAL to protect your customers' decks from stains, salt, and Mother Nature. Plus, choose from three different finishes to give your customers the finish they desire.

DECK-O-SHIELD provides a matte finish.

DECRA-SEAL NATURAL provides a natural finish.

DECK-O-GRIP provides a gloss finish.

All products are environmentally friendly. Your customers want options when deciding on a finish for their pool decks. With the three different choices offered by DECK-O-SEAL, now you have the versatility to give them their wish.

To determine if a surface can be sealed, drop water on the surface. If the water beads up and does not penetrate into the surface, like a drop of water on a mirror, then the surface cannot be sealed. If the water beads up but some of the water penetrates, then the surface can be sealed with a sealer designed to seal dense surfaces. If the water does not bead up, and penetrates into the surface, then that surface can be sealed with any of the sealers. If the water immediately spreads and penetrates, then a sealer for porous surfaces may need to be used or multiple coats of sealer may be needed.

SERVING YOUR POOL DECK CONSTRUCTION PRODUCT NEEDS FROM STRATEGIC U.S. AND CANADIAN LOCATIONS

We are W. R. MEADOWS, a national manufacturer, with a network of plant locations and stocked warehouses covering North America. Each location carries a full stock of high quality DECK-O-SEAL pool deck construction products.

We back our products with our coveted reputation for quality, service and integrity. You can be assured that your direct orders will be shipped promptly to your exact location on time and at competitive prices.
